

TENAX SNAP FASTENERS

The snap fasteners are the perfect solution to attach and removal your solar panels. Span fastener can be easily set up in the solar panel, and they provide a practical and elegant manner to install your solar in no more than 2 min.

They are well suited for being installed on canvas but they can also be placing on hard surfaces.

3M DUAL LOCK INDUSTRIAL VELCRO

The Dual Lock Industrial Velcro is a practical option to fix your solar panel on the canvas. This can be done by sewing the Velcro on to the canvas and fix the Velcro strip on the solar panel. It also allows you to change the location of the panel to where the sun shines.

This system can also be integrated in hard surfaces by adding the Velcro on other surfaces. This method provides a approachable and flexible solution to integrate your flexible solar panel in many different surface.
